

## REFLECTIVE BLINDS

Roller blind designed to filter or block out light at times of the day when a reduced level of lighting is preferred. The thing that makes Reflective Blinds unique, is that they are made from laminated polyester film. The film has a thin coating of aluminium sandwiched between the laminations. The polyester gives the film its colour, strength and pliability; while the aluminium, which is so thin you can see through it, provides the medium for reflecting the sun's rays. Also available as Blockout Blind to almost totally block sunlight.

### Reflective Blind:

- ▶ let you enjoy your view
- ▶ protect your furniture
- ▶ keep you cool in summer
- ▶ warm in winter
- ▶ give you daylight privacy
- ▶ and when they're not needed, they just roll away

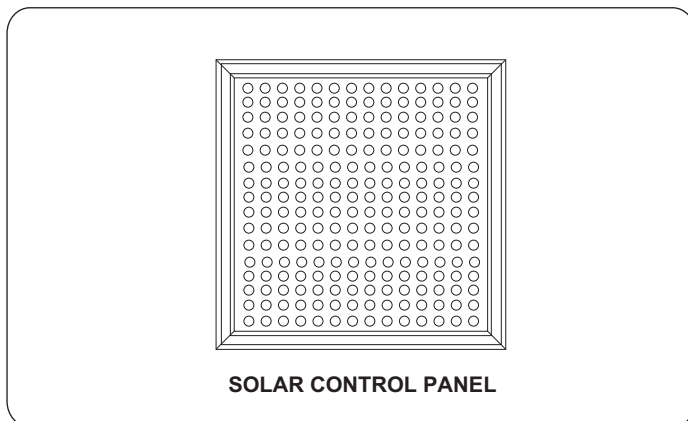

Reflective cord actuated roller Blinds are an excellent way of controlling heat, glare and fade while you retain your view.

Blockout cord actuated roller Blinds are ideal for rooms where it is desirable to exclude light during the day. Some common applications are nurseries and bedrooms used by shift workers.

Electric actuators available (POA).

## SOLAR CONTROL PANEL

Designed to reflect heat. It is best mounted at the top of the skylight, beneath the dome.

C.S.I.R.O testing information for Solar Control Panels:

56% of the sun's energy is reflected

Test report is available on request.
