

FEATURES

- ▶ simplicity in design
- ▶ tight manufacturing tolerances
- ▶ sturdy press-formed and fully welded frame construction
- ▶ light weight damper easy to install
- ▶ suitable for lightweight ceiling constructions
- ▶ adjustable mounting angles
- ▶ heat protective shielding on blade
- ▶ spring assisted closure

MECHANISM

The damper is mounted in the shaft of the skylight, just above the ceiling. When the fusible thermal link melts under heat, a fire resistant blade falls, blocking the spread of fire by forming a tightly sealed barrier.

TEST RESULTS

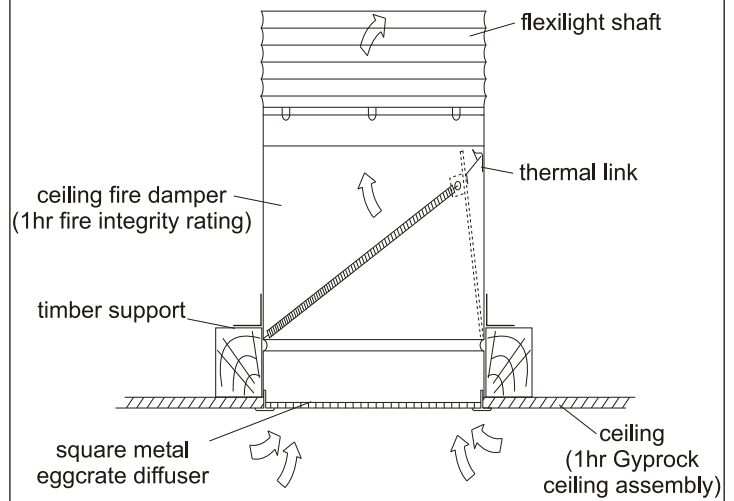

The single blade ceiling fire dampers were tested in a plaster board ceiling maximum size of 450 X 450. The damper has been tested to AS1530 as required by the fire damper code AS1682.1 and achieved a fire resistance of one hour.

Test certificate is available on request.

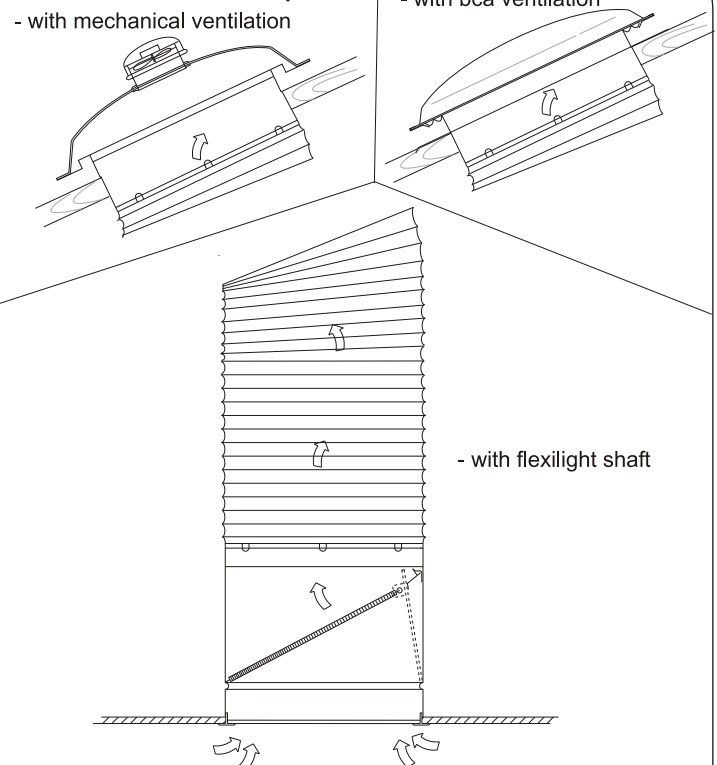

SELECTION CHART

SIZE	CODE
500 X 500 (Nominal)	SKFD

Ceiling Fire Damper:

Installation Examples:

NOTE : Fire Damper Models have a SQUARE eggcrate diffuser.
