

REV 400 SERIES

RETROFIT VENTILATION

Many houses in the past have had ventilation directed into the ceiling cavity. This can cause excess moisture to the ceiling cavity, creating an ideal environment for termites etc. This system allows air from an existing ceiling fan to the external atmosphere.

REV400

Static vent ducted to ceiling diffuser fan. Allows existing ceiling fan to exhaust to atmosphere

• Ceiling Fans can be supplied upon request (P.O.A.).
